PROFILE

I'm a React Js developer having skills to create web applications using HTML, CSS, Javascript, Bootstrap, React, Redux. I have experience in developing and maintaining applications based on React Js. I am an organized, detail-oriented and hardworking professional, who is always eager to learn new technologies and trends in web development. Furthermore, I have the ability to optimize web applications for better performance and user experience.

WORK EXPERIENCE

July 2022 – Present

Internship Skillhub IT Solutions – *Aurangabad*,

PERSONAL PROJECTS

Instagram - clone

https://mern-insta-clone-production.up.railway.app/

I had the opportunity to work on a React JS project that involved integrating various technologies to develop a Instagram - clone. I had to use react js for front end development, redux for state management and node js for back end development.

Ecommerse

https://mern-ecommerse-production.up.railway.app/

eCommerce project aims to create an online platform where users can browse and purchase products or services from various vendors. The platform will include features such as product listings, shopping carts, secure payment processing, order tracking, and customer reviews. The goal is to provide a convenient and user-friendly shopping experience for customers while offering vendors a platform to showcase and sell their products..

Appoinment (Doctor)

The Doctor Appointment project aims to develop a digital platform that facilitates the booking and management of medical appointments. The platform will enable patients to search for doctors, view their availability, and schedule appointments online. It will also include features such as appointment reminders, notifications, and the ability to cancel or reschedule appointments. The goal is to provide a convenient and efficient way for patients to book appointments and for doctors to manage their schedules effectively.

Portfolio

https://portfolio-manoj-dakle-production.up.railway.app/

This is my portfolio app. I make this app using create-react-app. I design this app using bootstrap framework. This is responsive app. In this app i tried to explained myself in breif. I have added my resume and all information about me. I added my all projects or recent work also.
